

Because of Issue 303, there would be two lines of the next code fragment at the bottom of this page.

```
def a():
    print "XX"
```

```
print "XX"
```

Because of Issue 303, there would be just two lines of the next code fragment in the *next* page.

```
print "XX"  
print "XX"
```

The next code fragment **should** be in this page.

```
def a():
    print "XX"
    print "XX"
```
